

LIFECYCLE-SERVICES

Full service contracts to meet your requirements

Why a GARANT service contract?

Maintaining the high performance of your GARANT machine over a long period of time is our common goal. For this reason we have developed a comprehensive, modular service contract concept which you can adapt to your own individual requirements.

Together we plan regular proactive service measures to identify problems at an early stage and to continuously improve the technical condition of the machine.

We offer you the security of receiving the right service at the right time and save money in the process: Long-term planning of regular service activities enables you to reduce your costs and unforeseeable problems. In this way, you ensure high machine availability and lay the foundation for long-term success in your markets.

The deployment of a service technician on site offers you fast and competent support whenever you need help – for the entire life of the machine!

Your advantages

- ✓ Reduced downtime
- ✓ Continual improvement of productivity and quality
- ✓ Contribution to preventative maintenance
- ✓ Structured processing and documentation of open service issues (open item list)
- ✓ Secured technician capacities through regular visits
