

EXTRA 5-FS

Cross bottom bag machine

Efficient, cost-effective and flexible - the **EXTRA 5-FS** for a successful production.

Discover the cross bottom bag machine from GARANT. Based on the proven TRIUMPH 5-F6 technology, the EXTRA 5-FS offers integrated servo support and operator-friendly machine guidance. Setup times are reduced and production can be fine-tuned on the fly, resulting in greater efficiency in day-to-day production at a modern level.

Thanks to the bag's versatility, there are numerous possible uses for the machine, such as e-commerce and hygiene applications. In the latter, for example, the EXTRA 5-FS can be seamlessly integrated into existing packaging lines. Thanks to the optional filling edge sealing, the full-surface PE coating can also be dispensed with, depending on the application. This enables resource-saving production with lower grammages and in compliance with the 95/5 EU standard.

With the flexibility to meet special requirements, several auxiliary units can also be added.

Format ranges for the EXTRA 5-FS

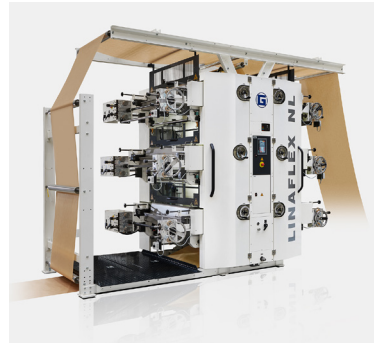

Tube width	8.66–18.11 inch	220–460 mm
Bottom width	3.15–7.48 inch	80–190 mm
Cut-off length	14.56–30.31 inch	370–770 mm

Optional additional devices
