

E.BAG SERIES

The future of shipping and return paper bags

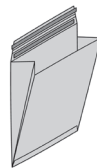

Especially for the e-commerce market

The e.BAG series offers exactly the solutions that meet the requirements for shipping and returns paper bags. This covers fast packaging processes, returns and growing end-user awareness of sustainable shipping. Whether flat and satchel bags, block-bottom bags or cross-bottom bags, the e.BAG series includes a range of versatile options to meet all shipping needs.

With advanced features such as the inline solution for applying a tear strip, opening shipping bags has never been easier or more convenient. Unlike traditional plastic tear strips, those in the e.BAG series are made of paper, making the bags even more environmentally friendly.

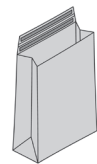

Various additional options allow the machines to be configured to meet individual needs. A high degree of innovation, the use of numerous servo drives, and modern drive technologies also ensure high efficiency and guarantee economical and competitive bag production.
